

Faster, secure access to device keys

Itron Water Solutions – Key Management Portal (KMP)

The Key Management Portal (KMP) is an application that centralizes and secures the encryption keys protecting every Itron Smart Water Solution. A user-friendly way to administer keys for the Intelis wSource water meter and Cyble 5 communication module, the KMP provides an end-to-end security framework that strengthens data protection while improving operational efficiency.

HOW IT WORKS

The key management process works as follows from key administration to delivery:

Access through Customer Center:

Customers and partners sign-in through Itron's Customer Center to access the Key Management Portal.

Devices and ownership are linked:

Compatible with Itron's Intelis wSource and Cyble 5, devices are linked to the appropriate customer or partner account using order information and serial numbers.

Keys are requested or claimed:

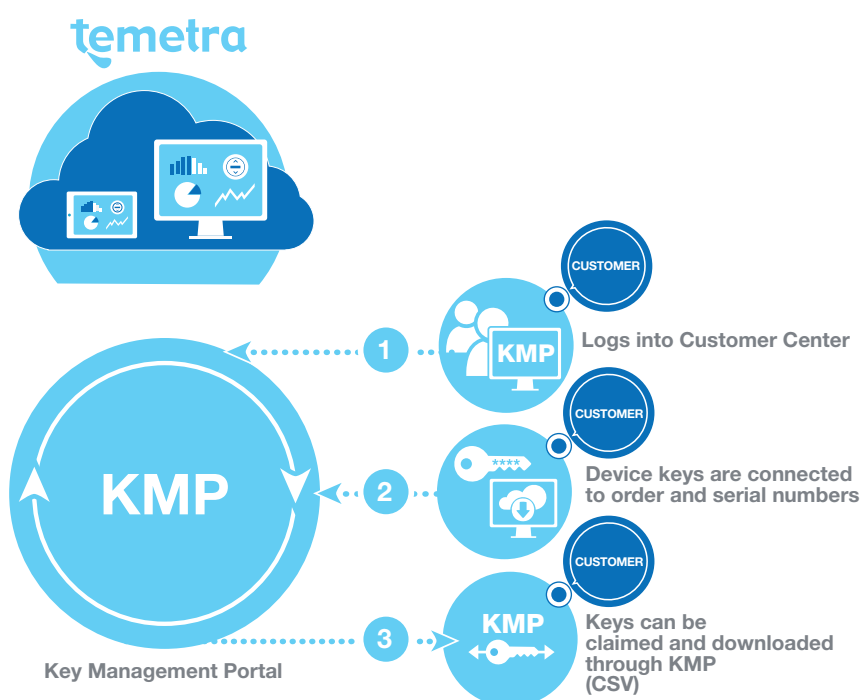

Users can request new keys, retrieve existing keys, or transfer customer ownership.

Keys are generated and protected:

Device key files are generated and secured using customer-provided GPG certificates, ensuring only authorized users can access them.

Keys are downloaded and used:

Once available, keys can be securely downloaded and decrypted for usage with Itron's Temetra solution and any 3rd party compatible system.

DESIGNED FOR PROTECTION

**KMP is built to deliver
practical advantages to customers:**

Centralized Security

A central, secure location
for Intel's wSource and
Cyble 5 encryption keys

Fast Access

No manual requests,
no waiting times

Full Visibility

Clear view of devices
and ownership

End-to-End Security

From the device
to key handover
